INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/US04/33760**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)

Claims 1-35 YESClaims NONE NO

Inventive Step (IS)

Claims 1-35 YESClaims NONE NO

Industrial Applicability (IA)

Claims 1-35 YESClaims NONE NO

2. Citations and Explanations (Rule 70.7)

Claims 1-35 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a carton including the combination of a handle aperture formed in a top end flap, an aperture in side end flaps aligned with the handle aperture in the top end flap and a paperboard insert with a handle aperture aligned with the other apertures and secured to one of the top end flap and the side end flaps. The patents to Rhodes et al and Wilson evidence the concept of providing handle apertures in the top end flaps and side end flaps of a carton, but fail to suggest reinforcement of such a handle construction. The patent to Collins evidences an endwall handle reinforcement (162) for handle apertures formed in the end walls of a carton, but fails to suggest reinforcement of a handle construction as specifically defined in the claims.

Claims 1-35 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
